

Jeffrey D. Walker
Yale University

100 College St. Rm 1126
New Haven, CT 06510

917-670-8073
jeffrey.walker@yale.edu

CURRENT POSITION

Associate Research Scientist, Saxena Lab
Yale University, Department of Biomedical Engineering
Wu Tsai Institute, Center for Neurocomputation and Machine Intelligence

October 2024 – present

EDUCATION

University of Chicago

PhD, Computational Neuroscience

Chicago, IL
October 2012 - July 2018

Dissertation: Methods for studying the neural control of natural behaviors using unconstrained marmosets

Advisor: Nicholas Hatsopoulos, Professor Organismal Biology & Anatomy

Wesleyan University

MA, Neuroscience and Behavior

Middletown, CT
2008 – 2009

Thesis: The Propagation of epileptiform events across the corpus callosum

Advisor: Gloster Aaron, Associate Professor Neuroscience and Behavior

BA, Honors, Neuroscience and Behavior

2004 – 2008

Thesis: The Interface of phenomenology and the cognitive sciences

Advisor: Steve Horst, Professor of Philosophy

RESEARCH EXPERIENCE

University of Chicago, Organismal Biology & Anatomy

Postdoctoral Scholar; Advisors: Nicholas Hatsopoulos and Jason MacLean

2018 – 2024

Sensorimotor cortical population dynamics across marmoset natural behaviors and sleep

University of Chicago, Committee on Computational Neuroscience

Graduate Research Assistant; Advisor: Nicholas Hatsopoulos

2012 – 2018

Methods to study the neural control of movement with common marmosets

Wesleyan University, Biology Department

Student then lab technician; Advisor: Gloster Aaron

2007 – 2010

Propagation of epileptiform events across the corpus callosum

UC Davis Center for Mind and Brain

Intern; Supervisor: Cliff Saron

Summer 2006

PREPRINTS

Walker J, Aparicio P, Saxena S, Hatsopoulos N, MacLean J (preprint) Natural prey capture reveals flexible reconfiguration of canonical motor-cortical dynamics for online control. *bioRxiv*. 10.64898/2026.09.01.748436

PUBLICATIONS

INVITED TALKS

Whole body modeling of sensorimotor control during prey capture by freely moving marmosets. BRAIN initiative Scholar Spotlight. 2026 BRAIN Initiative Conference.	August 2026
Whole body modeling of sensorimotor control during prey capture by freely moving marmosets. Simulated Bodies: Whole-body biomechanical models. Janelia Research Campus.	April 2026
Embodied simulation of natural behavior. Neurocybernetics at Scale. Champalimaud Research Symposium.	October 2025
Inaugural Chicago Symposium on Computational Neuroscience	June 2022
IBM, Health Care Life Science Research	October 2021

HONORS AND AWARDS

Scholar Spotlight, 2026 BRAIN Initiative Conference	2026
Travel Award, Neurocybernetics at Scale at the Champalimaud Centre for the Unknown	2025
Travel Award, 10 Questions in Non-Human Primate Neuroscience at Carnegie Melon	2025
NSF Integrative Training in Motor Control and Movement (moto-IGERT)	2014-2015
Howard Hughes Summer Fellowship	Summer 2007
Mind and Life Summer Research Institute Research Fellow	Summers 2007, 2008
Wesleyan Center for the Humanities Fellowship	Fall 2007
Edward W. Snowdon Fund Wesleyan	2006
Freeman Family Grant for the Study of East Asian Diaspora	Summer 2006

SERVICE

Pathways to Science (YPRI) , mentor, Yale University Served as mentor to New Haven high school student doing summer internship in science lab at Yale.	Summer 2026
Initiative for Maximizing Student Development (IMSD) , peer mentor, University of Chicago Participated in monthly discussion group around maximizing career success among graduate students from underrepresented backgrounds.	2015 – 2016
Synapse to Self Lecture Series , <i>Co-Organizer</i> , Wesleyan University Co-authored grant proposal as an undergraduate, with two faculty members, for an interdisciplinary lecture series about the mind and brain.	2006 – 2007
Mind Matters: Wesleyan Journal of Psychology , <i>Senior Editor</i> , Wesleyan University Published three annual journals of original undergraduate research in psychology and neuroscience. Organized all aspects of editorial process. Collaborated with other members of editorial board to coordinate the publication process. Maintained website. Recruited and interviewed student reviewers. Arranged and led meetings with student reviewers.	2005 – 2008

TEACHING EXPERIENCE

Yale University

Mentor, high school student from New Haven	Summer 2026
Mentor, three graduate students from Yale University	2025-present

University of Chicago

Mentor, three graduate students from the University of Chicago	2017-2024
Mentor, four undergraduates from University of Chicago and one from Tulane	2014-2024
Teaching assistant, Brains! workshop with local primary school	Dec 2015
Participant, Course Design and College Teaching, University of Chicago Center for Teaching	Spring 2014
Teaching assistant, Computational approaches to cognitive neuroscience	Spring 2014

Walker 4

Teaching assistant, Mathematical methods in the biological sciences
Wesleyan University
Teaching Assistant, Behavioral Neurobiology

Fall 2013

Fall 2008
